

Planet with a Forest // Brooke Lunderville

Stargate Command, have you put down your coffee?	F Bb
Are you sitting down and sedate?	C F
For I must announce an exciting discovery	F Bb
From our latest trip through the gate	C F

It's a planet with a forest!
See I told you - exciting and new
And not just any old forest!
Like the last three hundred and seventy two

I know what you're thinking, this is all so familiar
They just dialed the wrong place to explore
But I think when you've heard my next startling disclosure
You'll know we can't have been there before!

There's a village - in the forest!
It has hastily-made wooden shacks
And, sir, you aren't going to believe this -
They have papier maché artifacts!

On that planet - with a forest!
It's as novel as novel can be
It's not just any old forest
Like the last three hundred and seventy three!

You know, I am starting to have my suspicions
That we're not in a new galaxy
Though this planet we went to was at a new address
Your initials are carved in that tree

On that planet - with a forest!
Who could ask for anything more?
It's not just any old forest
Like the last three hundred and seventy four

It's a planet, with a forest!
Proving that novelty thrives
It's not just any old forest
Like the last three hundred and seventy five
